Our Solutions Align with Every Stage of Migration

Deploy a New or Upgraded Version of Software without any Loss of Productivity

New Horizons understands that every organization will have different needs, struggles and requirements when migrating to a new version of software, which is why our solutions align with every stage of the migration process.

Step 1: Receive Pre-Migration Consulting
In this vital stage of the Migration process, we provide one-on-one consultation to help you:
• Assess the new product or products which your company is planning to deploy.
• Serve up the new product or products in the least stressful way possible.
• Determine which product features could become possible stumbling blocks for employees.
• Successfully deliver the message of change to your employees.

Step 2: Execution & Delivery of Solutions Training
With an outline in place, we then move onto customized delivery, which includes:
• Addressing new product features, as well as best practices when transitioning from a legacy version.
• Determining which product-focused courses are best suited for your employees.
• Maintaining content parity—regardless of delivery modality (online or in the classroom).

Step 3: Post Deployment
We offer several, post–deployment solutions to help supplement or off-set your help desk, including:
• Desk-side Coaching—Live or virtual, a New Horizons coach is available to your employees.
• Online ANYTIME—Self-paced eLearning that employees can access at their own convenience.
• Follow-up Training—We can develop tailored training that addresses very specific components.
• Instant Learning Server—On-demand video learning that lives in the toolbar of any MS product.

Our Migration Success Stories

55,000 Employees at a Nationally-known Chemical Company Migrate from Lotus Notes to Exchange & SharePoint

New Horizons Migration Solutions include:
• Providing end-user training for their employees in Outlook 2010 and SharePoint 2010.
• Delivering a series of 2-hour webinars at several times and in multiple languages to reach all global employees.
• Creating a registration portal that all employees can use to locate and enroll in a session.

42,000 Employees at a Global Pharmaceutical Company Deploy Office 2010 & Windows 7

New Horizons Migration Solutions include:
• Constructing a custom training program, built around their global IT deployment schedule.
• Building a registration site, which became the entral place where all information for this deployment was hosted.
• Creating an "Excitement Video" which was then placed on the company's homepage.

44,000 Employees at the Largest Municipal Healthcare Organization in America Migrate from Office 2003 & Windows XP to Office 2010 & Windows 7

New Horizons Migration Solutions include:
• Coordinating the migration across the five boroughs of NYC, with an inventory of approximately 34,000 computer workstations to include mobile laptops.
• Delivering 90 minute training sessions and ran anywhere from 5-20 sessions per week.
• Creating a customized website to offer management the key metrics of training and deployment success across the enterprise.
